

Discussion Session - Experiment

Accessing and Understanding
the QCD Spectra

INT 20R-2C

Seattle, WA
March 23, 2023

Alexander Austregesilo

Define Experiment: Measurement

J. v. Fraunhofer, 1814

Define Experiment: Measurement

Raw data (electronic signals)

Reconstructed Data (4-vectors)

Selection of Reaction

Acceptance-corrected Data

Amplitude Analysis

S-Matrix Pole Positions

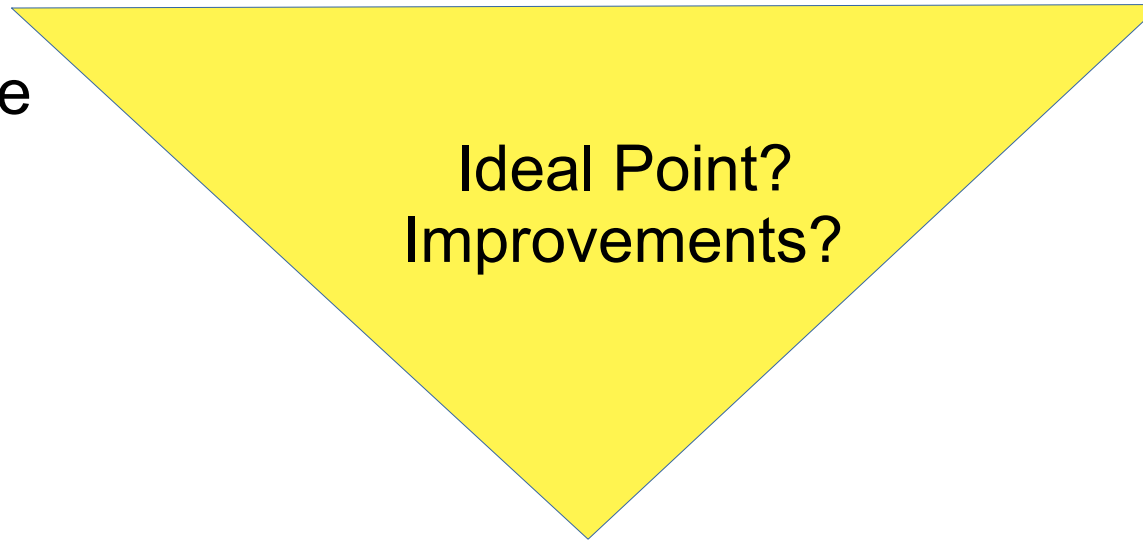

Model Dependence

Interaction between Theory and Experiments

Give Theoretician access to low level data

- ✓ no loss
- ✗ exp. Acceptance
- ✗ politics

Experiments apply sophisticated tools, models or amplitudes

- ✓ correct description
- ✗ training
- ✗ model dependence

Phenomenology works with Experiment on Analysis

- ✓ dialogue
- ✗ many authors
- ✗ takes time

What does AI/ML add to experimental spectroscopy analysis?

Hype Toy

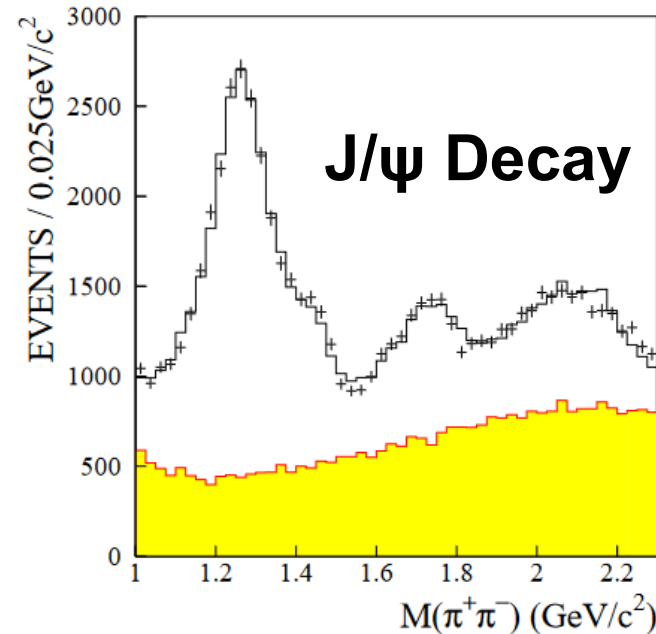

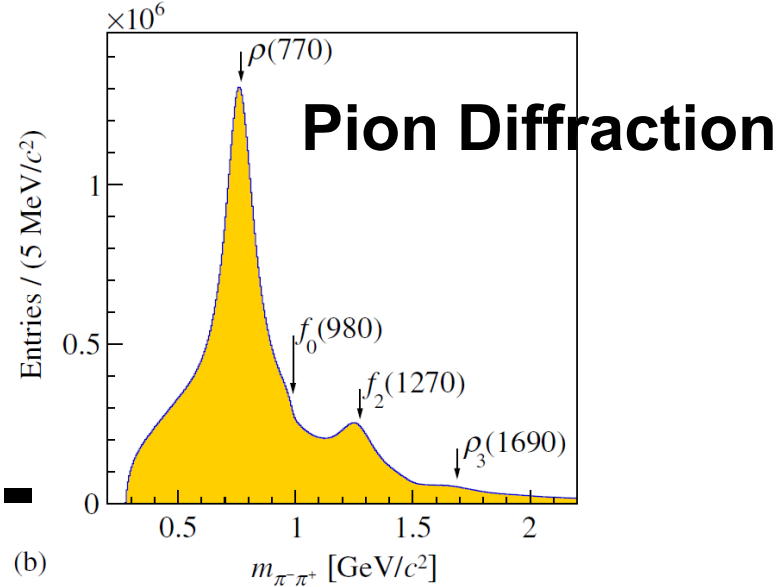

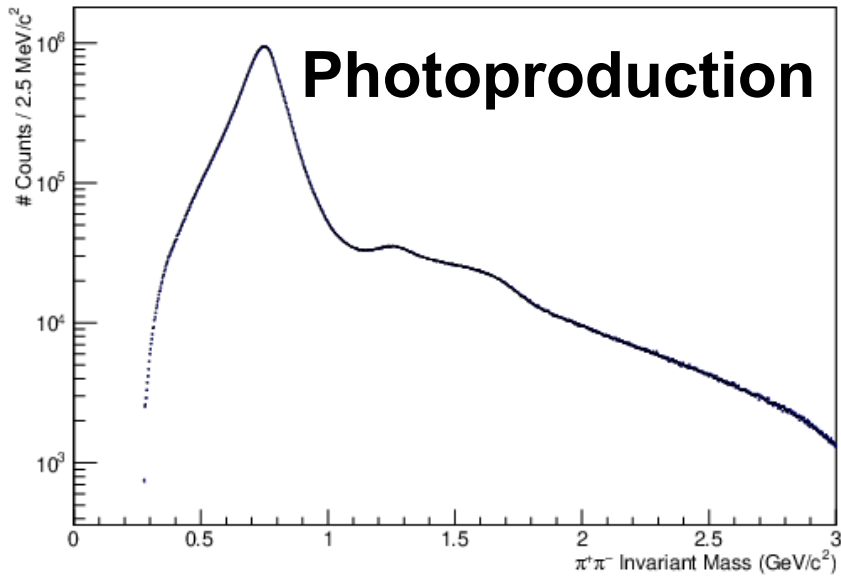

Fundamental Understanding

New ideas:

- information theory to impose continuity between mass bins without model-dependence (NIFTY)
- Deep learning for line shapes (JPAC)
- ...

Complementary Production Mechanisms

More ...

Future Experiments: New Facilities or new ideas for existing facilities

How to connect Lattice and Experiment?

Ideas for 3-body amplitudes in experiments?
